**Re: NOTICE OF VIOLATION
Fleischmann's Yeast
Tennessee Multi-Sector Storm Water Permit (TMSP) Tracking Number TNR050564
Shelby County**

Dear Mr. Leggett:

On May 27, 2011, Mrs. Maylynne Pynkala and Mrs. Lindsay Barrios, with the Tennessee Department of Environment and Conservation, Division of Water Pollution Control, Memphis Environmental Field Office (TDEC/WPC/MEFO), conducted a Compliance Evaluation Inspection (CEI) at the Fleischmann's Yeast facility located at 2743 Riverport Road in Memphis, Tennessee. Upon arrival at the facility, they met with you and Mr. Dennis Beene and stated that the purpose of the inspection was to evaluate the facility's compliance with its TMSP. This was accomplished by reviewing the facility's self-monitoring records and reports and conducting a walk-through inspection of the site.

Attached you will find a copy of the EPA Water Compliance Inspection Report, which summarizes the findings of the inspection. The overall score is 2.0, which indicates an unreliable self-monitoring program. The following violation was observed.

- A review of the facility's records revealed that annual storm water sampling had not been conducted (see Sector U, Part 5, "Monitoring and Reporting Requirements" of the TMSP). Under SIC code 2099, storm water outfall samples must be monitored for Total Suspended Solids (TSS).

Fleischmann's Yeast is in violation for non-compliance with the applicable TMSP permit requirements referenced above.

Required Action:

- Submit a written response on or before June 24, 2011, detailing what steps the company has taken and/or will take to ensure compliance with its TMSP permit requirements.

All correspondence should be mailed to the Division of Water Pollution Control, Memphis Environmental Field Office.

Your prompt attention and cooperation in this matter is appreciated. If you have any questions, please contact Mrs. Lindsay Barrios at (901) 371-3027.

Sincerely,

A handwritten signature in cursive script, reading "Terry R. Templeton".

Terry R. Templeton, P.G.
Manager
Division of Water Pollution Control
